NHA/Policy Guidelines/Supervision of Works/2020  
No. 18.42/2020 dated 21<sup>st</sup> April, 2020  
[Chairman's approval vide note dated 21.04.2020]

Sub : Proper Inspection of Congested Reaches with NHA in Cities/ Towns.

Due to congestion/ heavy traffic in normal days, thorough inspection of some of the reaches could not have been satisfactorily undertaken in the past like the reaches/ projects in cities/ towns.

2. Due to present COVID conditions and less traffic due to lockdown, AE/IE & PD may immediately identify and undertake the inspection of all above reaches in next 3-4 days duly examining the following and come out with solutions:

- (i) Poor riding quality especially at expansion joints of structures and its approaches (flyovers/ elevated roads);
- (ii) Poor condition of entry/exit to the project highway and improvements required to ease out the traffic piling up at these points;
- (iii) Proper drainage including relocation/ shifting of drains and/ or cleaning of drains;
- (iv) Any other engineering improvement required in these reaches.

3. ROs may get the list of such reaches and inspection report from each PD and submit a consolidated report within a week to Sh. S.K. Mishra, CGM (T).
