No. 11041/21/2005-Admn.

February 2, 2006

POLICY CIRCULAR: ADMINISTRATION/FINANCE (114/2006)

[Decision taken on MC Division's note dated 21.06.2006]

Sub: Photographs of Project Site – reg.

The National Highways being constructed are making considerable impact on the adjoining areas by aiding their growth and development. One of the ways to track this growth over years is to take photographs from vantage spots (from where a good and reasonably detailed view of the adjoining area is possible) at regular intervals, say six months to a year.

2. It has been decided that all Project Directors will select such spots and organize to have these photographs. The spots and the angles from which the photographs are taken should be properly referenced and documented so that there is no difficulty in revisiting the site. The photographs should preferably be always taken from the same spot.

3. The first set of photographs should be sent to the Librarian at the Headquarters by 15.02.2006 and repeated every six months.

This issues with the approval of Chairman, NHA.
